MDM 5000 Virtual Program

MDM 5000 Motors (60, 85 & 110 mm) ship in five (5) working days ARO!

Need a custom servomotor solution with off-the-shelf lead times? We've got what you need!

We engineered the MDM-5000 high-energy brushless servomotor with advanced design features to deliver the industry's highest available torque density in a compact and versatile platform. MDM-5000 servomotors are available in models that produce stall torque up to 35 to 40% higher than conventional designs. The high output is made possible by cut-core, segmented stator lamination technology contained in a high efficiency heat transfer capsule, high slot-fill windings, and a high flux neodymium magnet array.

Configurations available through the Virtual Program are:

Standard IEC or NEMA, 2000 Line Encoder, Connectorized or Flying Lead, IP 65 no seals WITH MULTIPLE WINDING OPTIONS
